# MARTIN ARUSALU

SOFTWARE DEVELOPER / DESIGNER

+372 566 693 78

martin.arusalu@gmail.com

# SUMMARY

I am a "Forever a student" which means that I Love learning. Despite the fact that I develop software, the main focus is on developing myself and I believe that this will only benefit the solutions I come up with. I am inspired by eye-catching design, clean understandable code and classical or jazz music. All of this makes me constantly positive. I might seem quite modest and even a bit shy at first, but it's just because of my self-oriented perfectionism. I strive for flawlessness in my actions and work.
